Hi, I'm Pablo Revuelta.

Phone   +64 22 694 4326   **Email**   hello@pablorevuelta.com   **Web**   www.pablorevuelta.com

I'm a Senior Software Developer specializing in JavaScript/Typescript, with a wealth of experience (over 15 years) in both development and design across New Zealand, Australia, and the USA. I've successfully worked in various roles, independently and in teams, within agile and waterfall environments. While my primary focus is React and NodeJS, I am proficient in a broad range of frontend and backend technologies.

Highly self-motivated and organized, I excel in problem-solving and building intuitive, user-friendly systems. Whether working solo or collaborating with teams, I deliver practical solutions that drive real value for stakeholders.

In addition to my technical skills, I can communicate effectively with both technical and non-technical teams, fostering collaboration and ensuring clear outcomes. I'm adaptable, thrive under pressure, and have experience mentoring junior developers to uphold high standards in project execution.

Technologies/Frameworks

Languages
Javascript/Typescript, Scala, GraphQL, SQL, Bash

JS Frameworks/Technologies
React, NodeJS, Svelte, SvelteKit, Angular, React-Native, Electron, Express, Redux, Meteor, Three.js, BabylonJS, Paper.js, Gatsby, NextJS, Vite, Parcel, Webpack, Bun.

Testing
Unit, integration and e2e testing using Jasmin, Mocha, Cypress, Jest and Playwright

CI/CD & Cloud
Jenkins, BitBucket pipelines, Docker, AWS, OpenShift

Database
PostgreSQL, MySQL, SQLite, MongoDB, Snowflake

HTML/CSS
Pug, Liquid, JSX, JSS, StyledComponents, Tailwind, Emotion, CSS Modules

User experience design
Information architecture, user flow development, responsive interface design, screen design and prototyping (currently using Figma).

Work experience

Senior Fullstack Developer (Svelte & Typescript)
DotLovesData | Contract
Sept 2024 - current

Currently contracting as a fullstack developer on a greenfields data-visualization app. My role includes setting up environments, deployment pipelines, data sourcing/db integration alongside front-end work.

Technologies:
Svelte, SvelteKit, NodeJS, Redis, docker, AWS LightSail & IAM, BitBucket pipelines, Snowflake, PostgreSQL

Senior Frontend Developer (React & Scala)
Goodcover (USA)
June 2022 - Aug 2024

I worked both as a Frontend Developer & UX Designer for a US insurance startup. I led the complete overhaul of their marketing website, implementing design improvements that boosted marketing-to-quote conversions by nearly 40%. In addition, I have played a key role in designing & developing new features and enhancements for the members' app and quote system, including a full re-design of the quote flow.

Technologies:
Scala, React, Jenkins, Docker, GraphQL, MySql, Figma

Senior Frontend Developer (React)
GS1 New Zealand | Contract
May 2021 - Feb 2022

At GS1, I worked on a product supply chain application that allowed customers to record product information.

Technologies:
React, Material UI

Senior Fullstack Developer (React, Angular, Node)
Bank of New Zealand | Contract
Apr 2019 - May 2021

Initially working on a staff lending app & Angular component library, I moved onto the React component library for BNZ digital assets and then worked on improving the internal documentation at the bank creating new tools, processes and resources for other technical staff.

Technologies:
React, Angular, NodeJS, Jenkins, OpenShift, AWS, Docker

Fullstack Developer
Locales
Aug 2016 - Apr 2019

I worked as the sole developer at Locales. My role included managing a small amount of infrastructure (local & cloud server), site & app development (front & backend), app deployments & version control. I was responsible for scoping, architecting, building & delivering a range of technical solutions for our clients. This has included static websites, mobile apps, business web apps and interactive kiosks.

Technologies:
React, React Native, Redux, Meteor, Node, Sqlite, Mongo, lots of bash.

Frontend Developer (Angular) / UX Designer
TradeMe
Oct 2014 - Aug 2016

I worked at Trade Me as a Senior UX Designer before I shifted across to the new product team working on the next version of the Trade Me website. My role was solely javascript development, working on both business features and the Trade Me angular component library. I was responsible for coding features, unit testing and working with testers on integrated testing. I also worked with other developers on solution design, code reviews and peer programming.

Technologies:
Angular, Typescript
